How to take photos for registration application.

Every horse registration or recording application with the AGHS must be accompanied by a set of photos. One photo is used on the registration or foal recording certificate and the other photos are kept on file for reference.

The photos must include one each of full front, full rear, full near side and full off side of the horse standing square as possible. Photos must include horse's body from ears to the ground, with the head up and no mane covering the side of the body or face in the photo. The tail can be plaited or pulled to the side. Please submit one additional photo of the mane hanging naturally for identification purposes.

We do accept that you may have trouble with foals, just do the best you can. The tail doesn't have to be pulled aside and you can resubmit photos when they are older.

Please write your name and the horses name on the back of each photo. Any photos showing signs of graphic enhancements will be rejected.

Incorrect examples of photos.
